

Recap

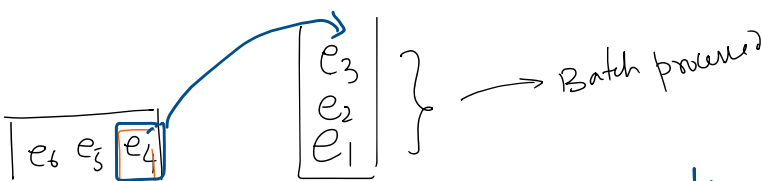

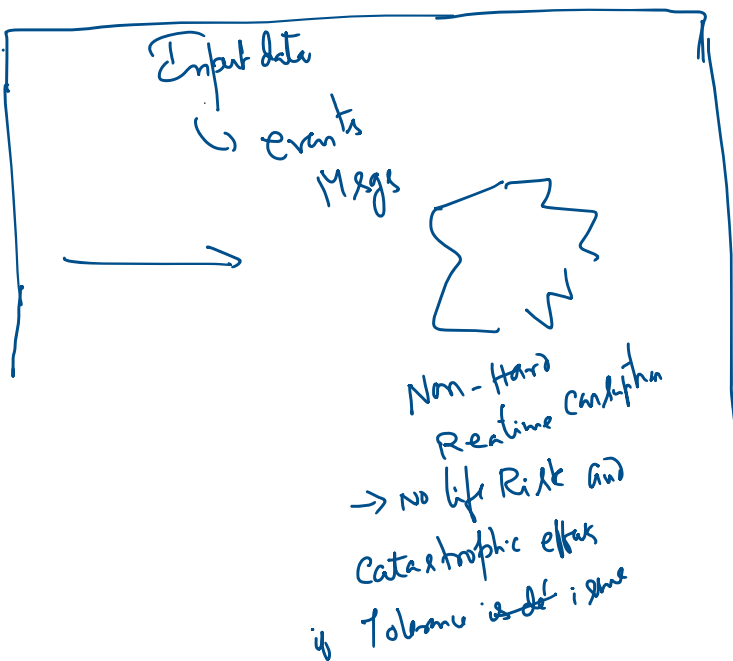

- ① Computational model
- ② Data model
- ③ Operations (functions)

Architecture related issues (Types)

Workload

- ① Batch processing
- ② Real time processing | stream
- ③ Interactive exploration
- ④ forecasting

X Not clearly articulated
 → Batch ✓
 → stream (//)

— Different perspective
 ... 1 element batch might drastically influence

Inclusion or Different perspective
 excluding very few events w.r.t current batch might drastically influence
 our inferencing =

① Batch size $\rightarrow$ quality of inferencing.
