

BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE, PILANI
Work Integrated Learning Programmes (WILP) Division

Dissertation Orientation Session for M.Tech DSE / M.Tech AIML

2nd Semester 2025-26

BITS Pilani

Pilani | Dubai | Goa | Hyderabad

Agenda

- General Ideas on Dissertation / Project / Project Work
- Organization Support
- Institute Support
- Grades
- Student Details, Reports Submission & Viva Scheduling Process

Problem Identification

- Non-trivial, analytical and application-oriented
- Preferably select an area of work that is considered vital to your employing organization.
- Should reduce cost (or) improve productivity (or) find new solutions to problems
- **M.Tech** level of Work
- Based on the courses studied in all previous semesters
- Worthy enough for **16 Weeks effort**
- Effort should be equivalent to **4 Courses of M.Tech**
- Original unpublished quality work
- Any attempt at plagiarism or use of unfair means will result in severe disciplinary action
- Reporting as per BITS requirements

The nature of project should be...

- your individual effort
- original
- involve significant research and/ or development project
- independently carried out
- presentable
- demonstrable
- defensible

“Not the regular work as is”

AIML Project Areas

- LLM-based chatbots and enterprise assistants (RAG, Graph-RAG)
- Document understanding (OCR + NLP, contracts, invoices)
- Text summarization and information extraction
- Multilingual and low-resource language processing
- Healthcare AI Systems
- Sentiment analysis and opinion mining at scale
- Explainable and trustworthy deep models
- Scalable DL systems and MLOps
- Emotion and intent detection from speech
- Voice assistants and conversational speech systems
- Audio event detection (alarms, machinery, surveillance)
- Computer Vision for Automation (smart manufacturing)
- Multimodal AI Systems
- Autonomous AI Agents
- Personalized Recommendation Engines

DSE Project Areas

- Real-Time Data Pipeline using Kafka and Spark Streaming
- Scalable ETL & Data Warehousing System for enterprise analytics
- Time-Series Forecasting System for sales, energy, or demand prediction
- Fraud & Anomaly Detection Platform on large transactional data
- Recommendation System at Scale using collaborative filtering
- Customer Churn Analytics System with dashboards
- Data Quality, Drift & Monitoring Framework
- Clickstream Analytics System for user behavior analysis
- MLOps Pipeline for model deployment, versioning, and monitoring
- IoT Sensor Data Analytics Platform for smart applications
- Edge-Based Data Compression & Filtering System to reduce cloud load

Artificial Intelligence & Machine Learning applications

- **Agentic AI & Autonomous Systems:**
 - Develop collaborating AI "agents" that can perform complex, multi-step tasks. For example, create a network of agents to manage a supply chain by autonomously monitoring weather, logistics, and market demand.
- **Fine-tuning Small Language Models (SLMs):** Domains like legal or for regional Indian languages.
- **Explainable AI (XAI) for Fintech:** Develop dashboards to explain loan approval or insurance underwriting decisions made by complex models.
- **Generative AI for Smart Cities:** Use models to generate synthetic data of urban traffic patterns in Indian cities to improve traffic management simulations.
- **Federated Learning for Healthcare:** Create a framework for hospitals to collaboratively train a diagnostic model (e.g., for diabetic retinopathy) without sharing sensitive patient data.
- **Reinforcement Learning (RL) for Robotics:** Train a robotic arm for a specific task in manufacturing, like sorting components on an assembly line.
- **Multimodal Emotion Recognition:** Build a system that analyzes facial expressions, voice tonality, and text to determine human emotion in real-time.

Data Science & Engineering applications

- Real-time Analytics on Streaming Data:**

- Design a scalable pipeline using tools like Kafka to analyze real-time public transport data

- MLOps for Continuous Deployment:**

- Build an end-to-end MLOps pipeline to automate the testing, deployment, and monitoring of a software product

- Graph Neural Networks (GNNs) for Fraud Detection:**

- Implement a GNN to identify fraudulent transaction within the UPI network.

- Building a Scalable Feature Store:**

- Engineer a centralized system to store, retrieve, and manage features for real-time model inference.

- AI for Sustainable Agriculture:**

- Develop a system using satellite imagery and sensor data to predict soil health and optimize irrigation for farms

- Automated Data Quality & Drift Monitoring:**

- Create a service that continuously monitors production data for quality issues and statistical drift, triggering alerts or retraining.

Healthcare Domain

- **Diagnosis and Treatment:**
 - Analyze medical images (X-rays, MRIs) to detect diseases early, assist in surgical planning, and predict patient outcomes preserving patient privacy
- **Drug Discovery:**
 - Accelerate the process of identifying and developing new drugs by analyzing vast amounts of chemical and biological data.
- **Personalized Medicine:**
 - Tailor treatment plans to individual patients based on their genetic makeup, lifestyle, and medical history. preserving patient privacy
- **Telemedicine:**
 - Provide remote patient care and support.

Environment and Sustainability

- [Climate Change Data Analysis](#)
- Predicting Fuel Efficiency
- Plant Species Identification
- Image captioning
- Improve energy efficiency
- Predict energy demand
- Optimize energy distribution

- **Fraud Detection:**
 - Identify suspicious patterns in financial transactions to prevent fraud.
- **Algorithmic Trading:**
 - Analyze market data and make trades automatically.
- **Risk Management:**
 - Assess and manage risks more effectively.
- **Customer Service:**
 - Handle customer inquiries and provide personalized financial advice.

[Time Series Analysis with Stock Price Data](#)

Transportation and Manufacturing

- **Autonomous Vehicles**
- **Traffic Management**
 - Optimize traffic flow by analyzing real-time traffic data.
- **Predictive Maintenance**
 - Predict when vehicles are likely to fail, allowing for proactive maintenance.
- **Retail**
 - Inventory management, personalized shopping experiences, and predicting customer demand.
- **Manufacturing**
 - Optimize production processes, predict equipment failures, and improve quality control.

Dissertation Process...

- People involved
 - Student, Supervisor, Additional Examiner, BITS Evaluator
 - Qualification
 - **Supervisor** should be B.E. / B.Tech. / M.Sc. / MBA / MCA with 5+ years of experience with Domain Expertise
 - **Additional Examiner** qualification will be equivalent to that of the Supervisor's qualification or even more like M.E. / M. Tech. / M.S. / MBA or he / she can be even a Ph.D. holder also
 - Must work in the same organization
 - **Your subordinate can neither be your Supervisor nor your Additional mentor. He / She should be in a position to give directions**

“Not the regular work as is”

Dissertation Process...

- BITS Evaluator
 - Assigned by BITS
 - Role

- Technology Support
 - Interactions with BITS evaluator during evaluation – MS Teams
 - Submission of documents - Dissertation Management System (**VIVA Portal**)

- Stages
 - Submission of Outline Proposal in the portal & Review
 - Assessment of Mid Semester Progress – Demo, Presentation, Report submission
 - Final Evaluation – Demo, Presentation, Report submission

Modus Operandi

- Registration

Eligibility criteria :

- No invalid grades – E/RRA in any of the courses studied with minimum CGPA of 5.5
- Upload of Documents / Review of Documents
- Declaration of Results

Organization Supervisor

- The Supervisor and Additional Examiner must be two different individuals preferably from the current employing organization.
- The same person cannot act as both the Supervisor as well as the Additional Examiner for the same student.
- In case you are unable to provide Supervisor and Additional Examiner from your current organization, we in principle approve the selection of either of them or both of them from another organization.

The student, in consultation with his/her Supervisor, identifies the topic of the Dissertation and prepares the detailed **Dissertation Outline**. Organizational member is expected to participate in the final review.

Role of Organization Supervisor

- It is recommended that Supervisor and Additional Examiner participate in the Final Net Viva session along with the student.
- Student should discuss with the Supervisor and Additional Examiner about their participation in the Final Net Viva session.
- Viva session which will be conducted in MS Teams for review of outline, mid semester progress and final project evaluation.
- **Student should share** the MS Teams invite for the Final Net Viva Session with the Supervisor and Additional Examiner.
- If the Supervisor and Additional Examiner are unavailable for the Final Net Viva session, the faculty will still go ahead and conduct the viva session with the student without any changes.

Institute Support

- BITS Evaluator will be appointed for every student to evaluate their progress.
- BITS Campus Lab Access
- OpenAthens eLibrary Access
- Course handout containing the complete instructions & template pertaining to your Project Work will be uploaded on the eLearn Taxila portal, <https://elearn.bits-pilani.ac.in/>
- BITS Evaluator will conduct viva and accept / reject outline, provide feedback/suggestion for mid semester Report submission and grade the final project.

- The final grades for Dissertation are Non-Letter grades namely **Excellent, Good, Fair and Poor**.
- Since no grade point are attached with Non-Letter grades, it does not affect CGPA computation.

S. No.	Component	Weight
1.	Abstract / Outline	10%
2.	Mid-Semester Report	30%
3.	Final Report	60% (out of 60%, 10% organization supervisor feedback)

Under the following conditions, students who appear for their final viva voce may also be graded RRA (Required to Register Again) after evaluation, under the following conditions:

- a. Student is unable to technically present/defend the work done.
- b. Technical knowledge/competence of the student is inadequate.
- c. The work report submitted is inadequate or incomplete.
- d. The work/report is found to be plagiarized.

Final Net Viva Session

- The student should submit the Final Dissertation Report (pdf format) to the Supervisor and Additional Examiner, at least two weeks before the deadline. The Supervisor should evaluate the final report and conduct the pre-final seminar and viva-voce for the student, along with the additional examiner. The Supervisor and the Additional Examiner should jointly complete the pre-final evaluation sheet and recommend the pre-final grade for the Dissertation.
- In addition to the pre-final evaluation done by the Supervisor and Additional Examiner, the student must be prepared to appear for an online NET Viva during outline, mid semester and defend the Dissertation / Project to the panel during final review. The final grade in Dissertation would be based on the Supervisor's evaluation as well as the independent evaluation by BITS Faculty.
- The outline review will be for 10 mins, mid semester review 15 mins and final viva for 30 mins. During the final viva each student will be required to make a technical presentation for about 20 minutes using Microsoft PowerPoint. The presentation will be followed by viva-voce for about 10 minutes. Students must be prepared to demonstrate their project during their presentation.

Student Details, Reports Submission & Viva Scheduling Process

Submitting Student Details on eLearn Taxila Portal

Employing Organization:	
Degree Program:	
Research Area:	
Dissertation/Project/Project Work Title:	
Supervisor's Name:	
Supervisor's Email:	
Supervisor's Qualification:	
Supervisor's Designation & Address:	
Supervisor's Phone No. (with STD code):	
Additional Examiner's Name:	
Additional Examiner's Email:	
Additional Examiner's Qualification:	
Additional Examiner's Designation & Address:	
Additional Examiner's Phone No. (with STD code):	

Steps for Submitting Student Details

- Log in to the eLearn portal (<https://elearn.bits-pilani.ac.in/>) with your BITS eLearn Mail ID and password.
- Click **My Courses** Link and then click on **Dissertation** Course Link to access the common **Dissertation** Course page.

Self-Plagiarism Check for Mid-Semester Report Submission

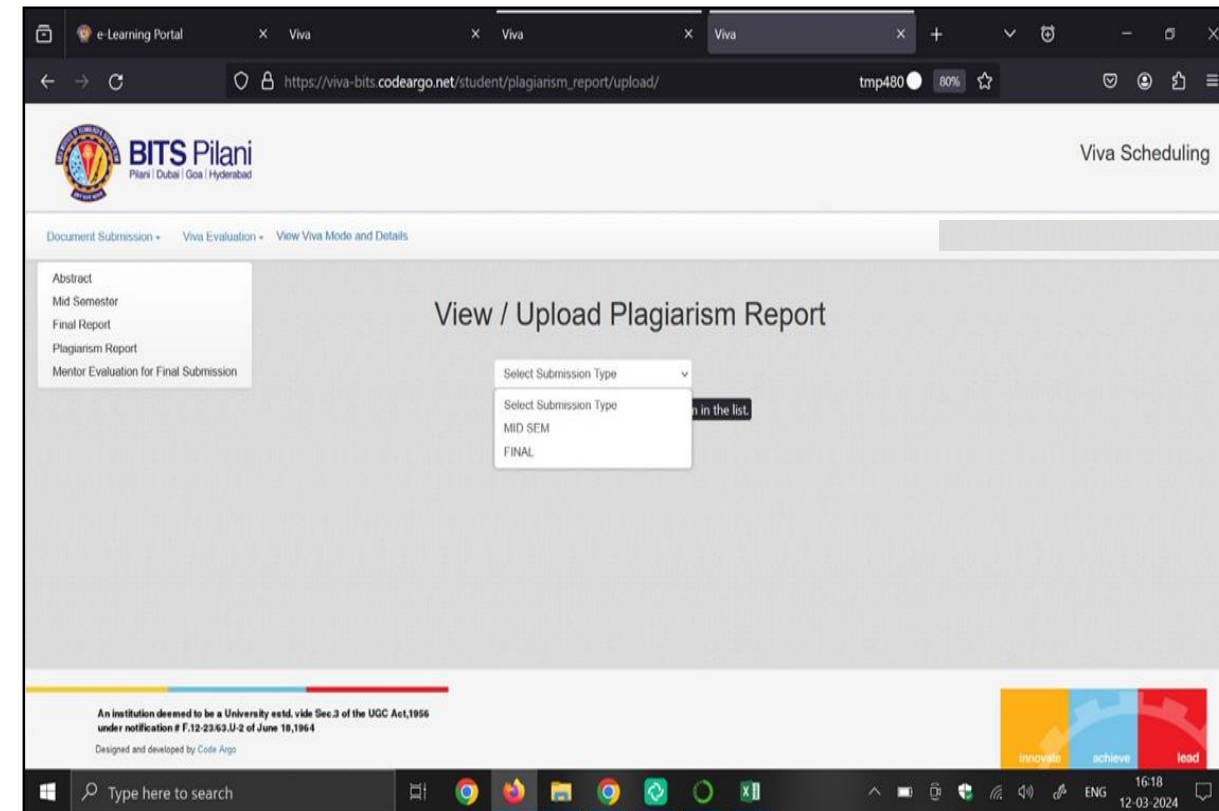

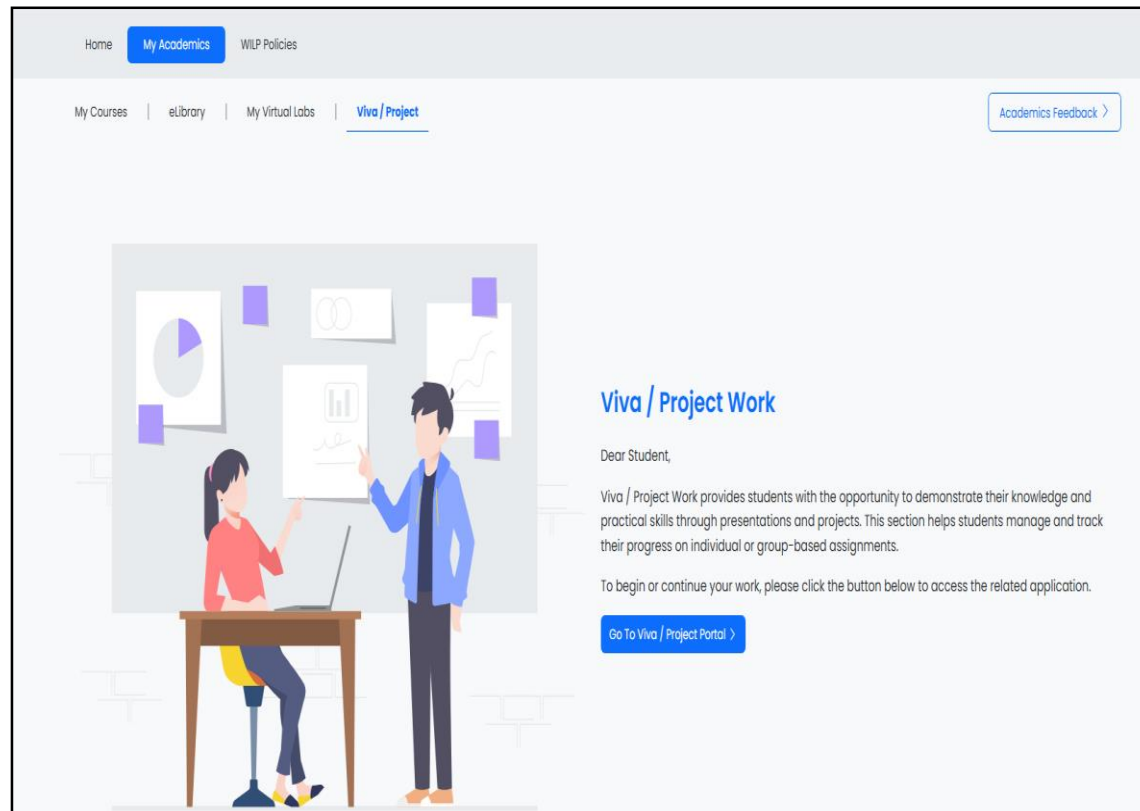

- Students have to mandatorily do the Self-Plagiarism Check for their Mid-Semester Report through the Turnitin Plagiarism Tool before uploading it on the Viva Portal.
- Please refer to the below link for the guidelines for setting up the Turnitin Plagiarism Tool Account:
- [Turnitin Plagiarism Tool Account Setup Guidelines](#)
- Turnitin Plagiarism Tool Account will be activated 5 days before the Mid-Semester Report submission deadline, and the account access will remain till the Final Report submission deadline.
- If the report similarity index generated through the Turnitin Plagiarism Tool is higher than the permissible limit of 25%, students have to rework and change their report content and "Resubmit" the report again before the given due date. Once students upload an updated report, the previously submitted report will be replaced with a newly submitted report.
- The student account registration and login credential on Turnitin will be open 5 days before the Mid Semester report submission deadline and the access will remain till the final report submission deadline.
- **Plagiarism must not exceed 25%. Faculty will consider the Student Report for Evaluation only if the Plagiarism % is within the permissible limit of 25%.**

Steps For Submitting Mid-Semester Plagiarism Report On the Viva Portal.

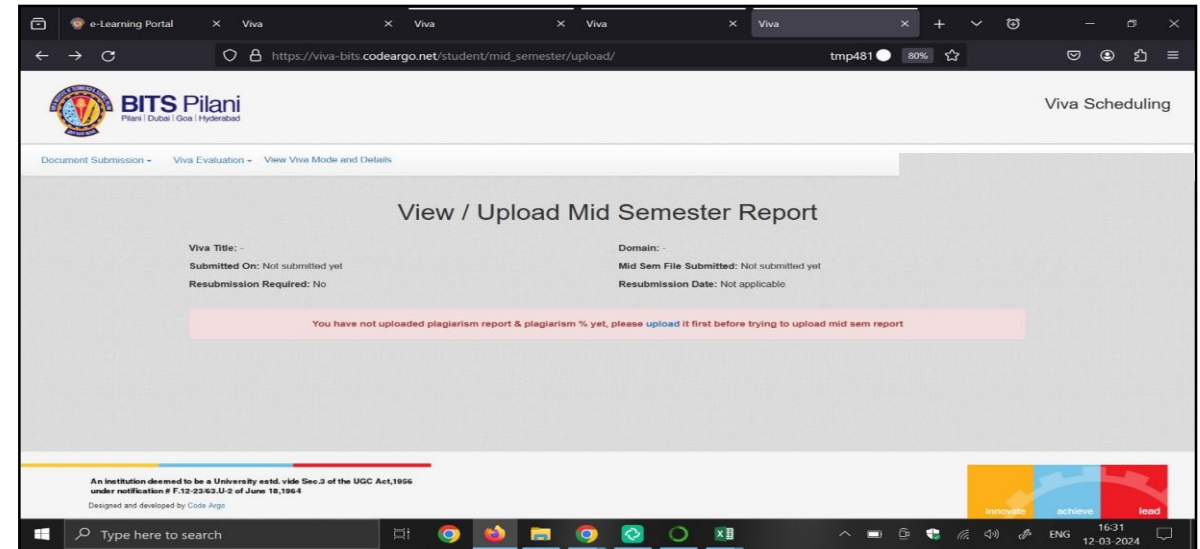

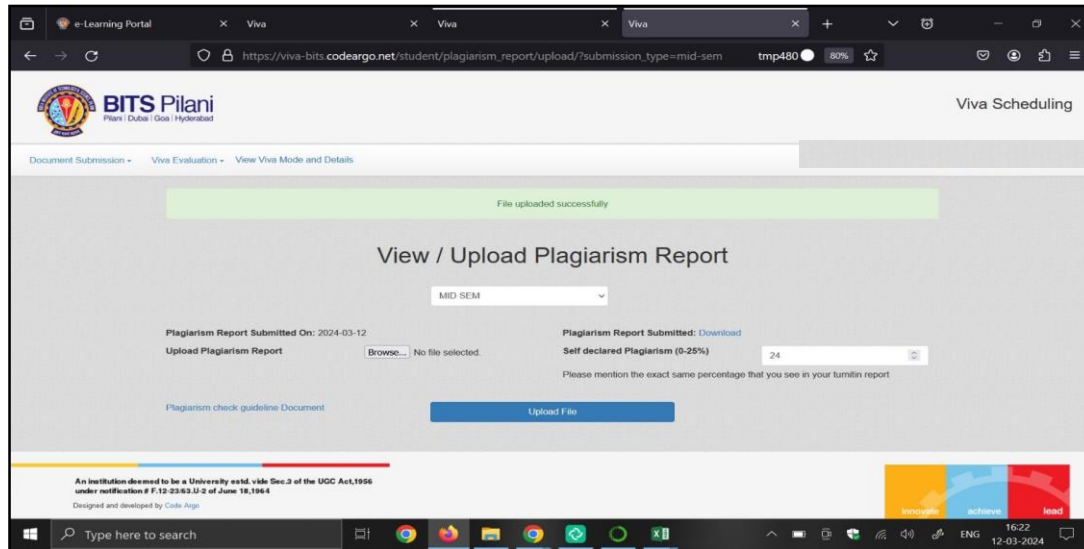

- Log in to the eLearn Portal using your BITS eLearn Mail ID and password at <https://elearn.bits-pilani.ac.in/>,
- Navigate to the "Viva / Project Work" Section

Steps For Submitting Mid-Semester Plagiarism Report On the Viva Portal.

- Choose "Plagiarism Report" and select the "Mid-Semester/Final Report",
- Upload the Plagiarism Report file, Submit the Turnitin report on the Viva Portal.
- Once completed, you will be able to proceed with uploading the Mid Semester /final Report.

You must upload the plagiarism report before submitting the rest of your report on the portal

Steps for Submitting Mid-Semester Report

- You can submit the Mid-Semester Report on the Viva Portal on or before the Hard Submission deadline.
- Make sure that before Mid-Semester Report you should submit Mid-Semester Plagiarism Report. Without Plagiarism Report, portal will not allow you to submit Mid-Semester Report.**
- Click on the “**Document Submission**” link on the Top left of the screen of the Viva portal page to make the selection from the dropdown.
- Click on “**Mid Semester**” option in the dropdown to view or upload the Mid-Semester Report on the Viva portal.

Important Points Viva Date Selection, Sharing on the Viva Portal & Support

Summary:-

- Log in, navigate to the Viva section, select submission type, and book your date.
- The viva link will be shared on the MS Teams account a day before the viva

Important Notes:

- You are suggested to select / book the Viva Date for the upcoming Online Viva session's with your Faculty Mentor as per your convenience based on the Available Date options given on the Viva portal.
- Once VIVA link reflects in your teams account, It is your duty to share the link with your Supervisor & Additional Examiner so that they can join the VIVA session.

Reminders:

- Double-check the date and time.
- Contact support if you encounter any issues. (support@wilp.bits-pilani.ac.in)

Q & A Session
